Feedback on your performance is printed below. The report lists the objectives for which you answered a question incorrectly.

- Compile Java code, produce modular and non-modular jars, runtime images, and implement migration using unnamed and automatic modules
- Create Java arrays, List, Set, Map and Deque collections, and produce, remove, update, retrieve and sort their elements
- Create program flow control constructs including if/else, switch statements and expressions, loops, and break and continue statements
- Implement localization using locales, resource bundles, parse and format messages, dates, times, and numbers including currency and percentage values
- Manipulate date, time, duration, period, instant and time-zone objects using Date-Time API
- Perform decomposition, concatenation and reduction, and grouping and partitioning on sequential and parallel streams
- Process Java collections concurrently and utilise parallel streams.

If this is the final exam in your certification path, you are required to complete the following steps.

- Visit certification.oracle.com and select your certification path to ensure you are aware of all certification requirements.
  - Note that completion of the required training and approval of the course submission form are also required in paths that require training.
- Check certview.oracle.com to confirm that all completed components are in your profile.
  - If exams that you have taken do not show up, you may have taken them under a different Oracle Testing ID.
  - Contact www.pearsonvue.com/oracle/contact to merge your IDs (provide all IDs under which you have taken exams or submitted forms and confirm which ID should be the 'surviving id').
